Potential Water Pressure Fluctuations – McGuire Subdivision

Petawawa, ON – Attention Petawawa residents: Due to a large watermain break in the City of Pembroke water distribution system, the City has asked the Town to temporarily refrain from drawing supplemental water from the City's water system.

Internal adjustments have been made to the Town's water distribution system to ensure the continued supply of safe, potable water.

Residents in the McGuire Subdivision area (Centre Street, Easy Street, Fairway Drive, First Avenue, Golf Course Road, Lakeview Avenue, McGuire Street, Pinegrove Crescent, and Ruth Street) may encounter water pressure fluctuations due to the adjustments of the water distribution system.

For more information or residential plumbing concerns after hours, please contact Ontario Clean Water Agency (OCWA) at 1-800-361-6052.
